and animals'

'what are natural  
resources types and  
threats to natural  
June 5th, 2020 -  
defines natural  
resources as natural  
resources are  
resources that exist  
without the actions of  
humankind this  
includes all valued  
characteristics such  
as magnetic  
gravitational and  
electrical properties  
and forces on earth we  
include sunlight  
atmosphere water land  
air includes all  
minerals along with  
all vegetation and  
animal life that  
naturally subsists  
upon or within'

'richest african  
countries in terms of  
natural resources

June 5th, 2020 - in  
particular african  
countries are the  
leaders in such  
minerals as diamonds  
platinum zirconium  
cobalt bauxite and  
others the mining of  
these natural  
resources has

---

significantly decreased in the latest years but this does not deny the fact that african mineral potential is really rich and can be used for the best economical purposes by the governments'

**'how are minerals formed sciencing**

*June 5th, 2020 - minerals provide a basic reference for geologists to study the earth s crust and are separated into categories based on their mineral position and structure extrusive rocks are formed from minerals that crystallized quickly as magma cooled outside earth s crust forming smaller crystals'*
